Declaration of Non-Medical Status

Product Identification:

- **Software:** Charder Smart Data Manager Software

Description and Intended Use:

The Charder Smart Data Manager Software is a data management tool designed to store and display measurements transmitted from Charder devices (such as Weight Scales). **It is intended to be used for demo purposes only.**

Regulatory Justification:

We hereby declare that the aforementioned software does not meet the definition of a "Medical Device" as defined by Regulation (EU) 2017/745 (MDR) or similar international regulations. This determination is based on the following:

- **Administrative Function:** The software performs only data storage and secondary visualization. It does not perform primary diagnostic calculations, automate medical interpretations, or drive clinical decision-making.
- **Hardware Dependency:** All medical-grade measurements are performed by the Charder devices (the certified medical device) prior to data transmission.

Consequently, the Charder Smart Data Manager Software is classified as a standard Information Technology (IT) solution, and falls outside the scope of medical device registration requirements.
